

The Multiple-used Study on Spraying Nozzle for Slopeland Orchard

Mig-Jyh Horng¹

SUMMARY

The planning goal of development on Multi-used spraying Nozzle for slopeland orchard, utilized in water spraying and herbicides, spraying, is owing to solve, The problems of pest-prevention and farm-limitation on slope-land. This Newly developed sprayer is Auto-rotation dies with spraying nozzle of simple design construction and of cheap expenses in manufacture, and moving without electric currency.

Utilization: 1. For pesticides spraying. Most irrigation and fertilization in orchards and protective horticultural facilities.
2. For humidity regulation and air-cooling in sianggu mushroom Cultivation:

1. Junior specialist, Taitung DAIS.
